

**Mobile double-column motorized height adjustable floor stand**

The double-column design guarantees the stability needed to work with Interactive Touchscreens up to 86" diagonal with a 254 Lbs.[115 kg] total weight capacity. The wired remote control unit (no batteries) can be placed at a convenient and easy to reach location, allowing the user to adjust the height of the screen safely and quietly. The motorized stand has an anti collision feature to prevent accidental pinching, when the system is moving and senses an obstruction it will stop and retreat. On the backside of the integrated vesa mounting box (max 600x400) a lock-box is located where the electronic controls are safely located, this lock-box can be used to place a mini-PC, thin-client PC or NUC. The 26" travel will guarantee full screen access for all users, the product is ideal for wheelchair users.

With the optional accessories the product can be equipped for use with a laptop or keyboard tray, teleconferencing equipment, a document camera or a soundbar.
